The article analyses the new law about public easements and changes, input in Land Law of the Russian Federation and related normal acts. The authors put their objective to conduct the complex analysis of the changes input into the legislation, regulating the institute of public easement. There used the method of definition analysis of private and public easements, new laws in legislation, changing the easement nature in legal and geospatial aspects, and the method of different approaches comparison to their legal nature. Herewith colligated the problems, which the subjects, who apply the corresponding statements about easement initiation, will come across with, and also in overlapping easement boundaries and their crossing with settlements boundaries. The result of the research is the set of statements, colligating the advantages and disadvantages of the mentioned new laws in legal and geospatial aspects; there is the conclusion about the fact that the public easement is becoming the part of relations in territorial planning. The authors foretell the restriction to understandability of the changed legislation and its difficulty in legal application, and also increased difficulty in public easements registration activities.

Key words: public easement, definition, legal nature, state registration, boundaries, graphic description of boundaries location, reference points' list, registration number, boundary crossing, linear objects, settlements, petitions about public easement.
